Who owns the data?

# Who owns all the data collected by 'smart cities'?

Data ownership is about control, which can be exercised either for public good or for private gain, Teresa Scassa writes.

how will it be used?

who owns the data?

## Sidewalk Toronto — The Plan for R&D with Our Civic Data Finally Comes Into Focus

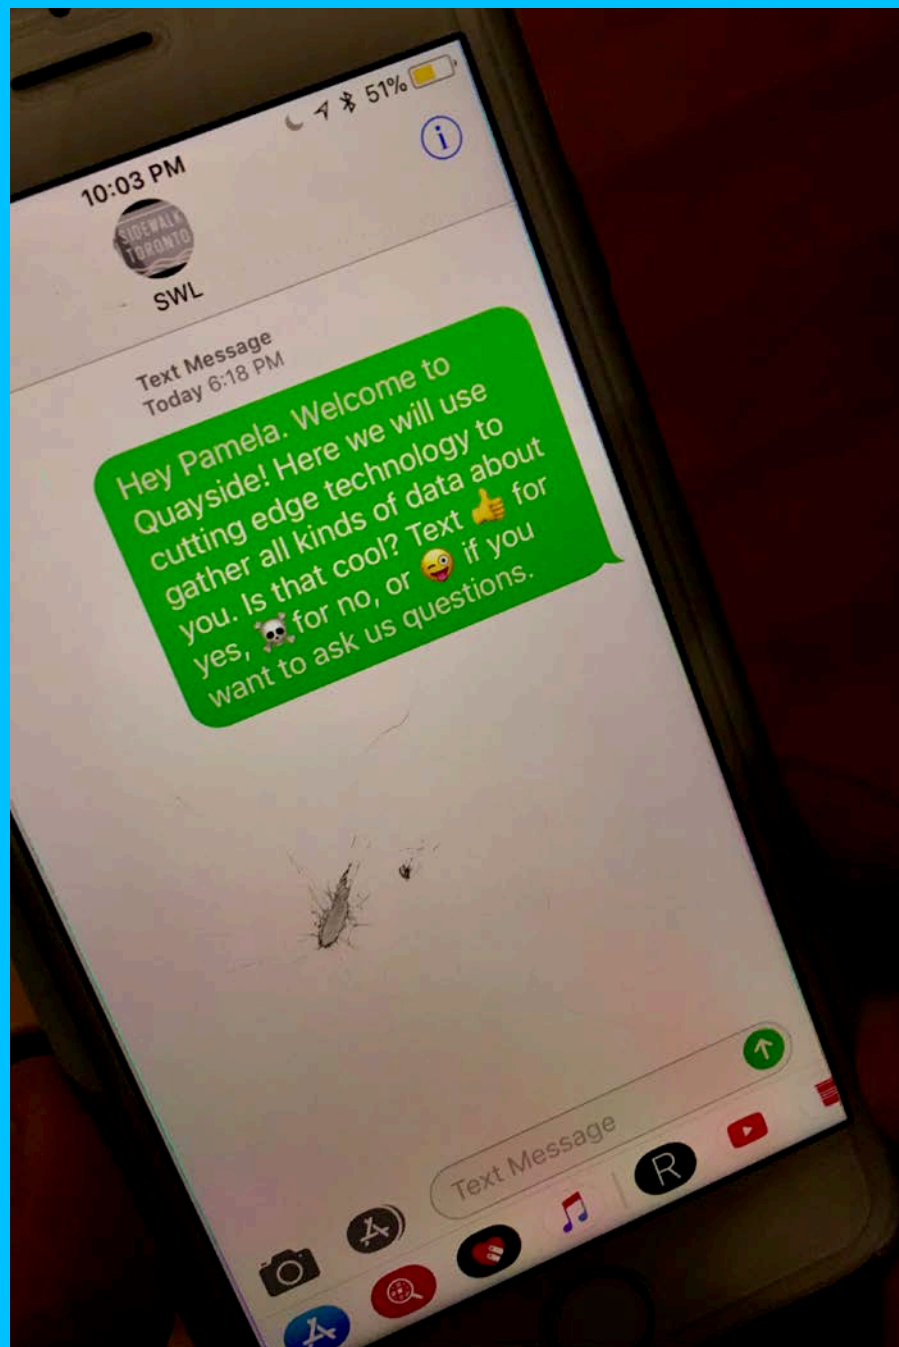

so now what's next?

how will it be used?

who owns the data?

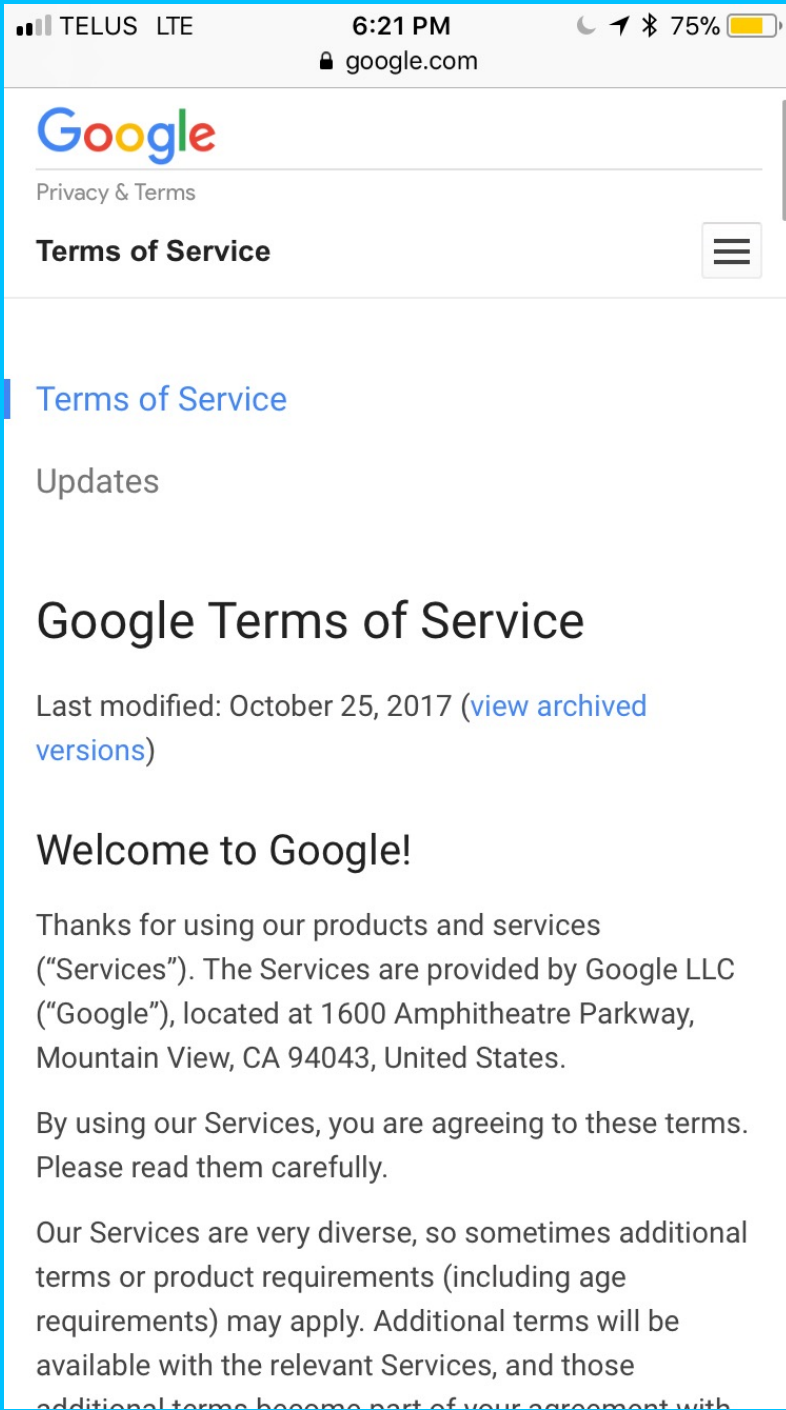

**How do we make it easy for people to know/remember that lots of data collection is happening here?**

**Can we use mobile  
technology  
to help people  
realize  
they have entered  
a new kind of  
“public” space?**

Companies make us  
sign a terms of  
service.

Has the time come  
for us to collectively  
develop our own?

If you want to gather  
**our data**, here are  
**our terms and  
conditions ...**

YOU'VE  
CHANGED
